

Endevco, Ferroperm, Vibro-Meter, Sensorex and Wilcoxon Research have been combined into a single Meggitt Sensing Systems division

February 2010

The Meggitt group is making the transition to a new structure comprising five operating divisions: Meggitt Sensing Systems, Meggitt Aircraft Braking Systems, Meggitt Control Systems, Meggitt Polymers & Composites and Meggitt Equipment Group. Based on core capabilities, this is designed to build stronger, more integrated operating divisions. The transition should be completed in 2010.

As part of this process, operating units Endevco, Ferroperm, Vibro-Meter France (Sensorex), Vibro-Meter Inc, Vibro-Meter SA, Vibro-Meter UK and Wilcoxon Research have been combined into a single Meggitt Sensing Systems division. This combines expertise in sensing and monitoring physical parameters in extreme environments.

Meggitt Sensing Systems will have strong foundations. We will incorporate best practice from each Meggitt unit to optimise business operations and align our customer-facing organisation with our primary markets - aerospace; energy; and measurement. We are confident this will provide our customers with easier access to the full range of Meggitt's leading sensing and monitoring solutions and that, by combining our resources, we will create a more responsive service.

Over the next few months, you will begin to see some changes in how we identify ourselves. There will be branding, signage and name changes. However, as our fundamental legal structure will remain unchanged, there should be no need to novate or reassign any existing contracts or orders. If you are already doing business with us, your main contacts within our organisation will remain the same. We will contact you directly if any change occurs.

To learn more about the structure and capabilities of the new Meggitt Sensing Systems division, please visit: www.meggittsensingsystems.com.

Until our transformation is complete, you can find more product, service and business information on existing Meggitt Sensing Systems websites: www.vibro-meter.com; www.sensorex.fr; www.wilcoxon.com; www.endevco.com; and www.ferroperm-piezo.com.

For further information on Meggitt PLC and the capabilities of other Meggitt divisions, visit www.meggitt.com. The attached chart shows how the company fits into the new structure.

Please do not hesitate to contact your local salesperson, should you have any queries.
